

Brainstorming & Idea Prioritization Template

Date	26 June 2026
Team ID	
Project Name	Rising Waters
Maximum Marks	3 Marks

Step-1: Team Gathering, Collaboration & Problem Selection

The team gathered to collaboratively discuss and analyze different ideas related to disaster management, focusing on improving flood prediction and early warning systems using a machine learning approach.

Project: RISING WATERS
(Flood Early Warning & Alert System)

Rising Waters is an intelligent system that predicts flood risks early and sends real-time alerts to help people and communities stay safe and prepared.

- 10 minutes to prepare
- 1 hour to collaborate
- 2-8 people recommended

Before you collaborate
A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

10 minutes

- Team gathering**
Define who should participate in the session and send an invite. Share relevant information or pre-work ahead.
- Set the goal**
Think about the problem you'll be focusing on solving in the brainstorming session.
- Learn how to use the facilitation tools**
Use the Facilitation Superpowers to run a happy and productive session.

1 Define your problem statement
What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

5 minutes

PROBLEM
How might we provide accurate flood predictions and real-time alerts to help people and communities stay safe?

Key rules of brainstorming
To run a smooth and productive session

- Stay in topic.
- Defer judgment.
- Go for volume.
- Encourage wild ideas.
- Listen to others.
- If possible, be visual.

Step 2: Brainstorm and Idea Listing

Each team member lists as many ideas as possible without judging them at this stage to explore different solutions for flood prediction and early warning systems.

Brainstorming & Idea Prioritization Template

Step 3: Idea Prioritization

Each group of ideas is evaluated based on feasibility and importance, and the most effective solution is selected for further development in the flood prediction system.

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
1	ML Flood Prediction System	High	High	1	Yes
2	Historical Rainfall Analysis	High	High	2	Yes
3	Flask Web App + Alert System	Medium	High	3	Yes
